Care of Evergreens

Balled evergreens should be planted with the burlap. Evergreens need heavy watering the first week after planting, then at least once a week, especially during dry . . . They should have good heavy watering late in the fall before freezing weather.

TRIMMING

It is best to trim evergreens during the spring, April.

SPRAYING

BAG WORMS are now worst pest, they become active in June and July. Spray with ARSENATE OF LEAD, 1 pound to 25 gallons of water, or use MALATHION, but be careful, it will burn the trees if it is too strong.

Broadleaf Evergreens

Broadleaf Evergreen is a Shrub-Like, Plant
That Holds its Foliage All Winter

EUONYMUS (Acutus) a creeper or vine.—Winter-creeper. Lowest growing of the evergreen winter-creepers. Grows 6 in. high and covers the ground. Small deep green foliage, can be grown as a vine by help, fine for shady side. 8 to 10 in. plants from field, 75c each.
